

4 TIER SHELF

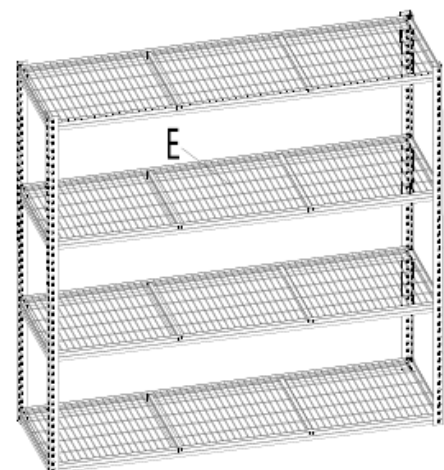

1. Pick up Long Beams (part B) and Short Beams (part C) attached to the column of Keyhole Frame (part A) by inserting the clips into the keyholes of the column.

2. Put each beam to the frames, and you can choose the shelf level as your requirement.

3. Assemble 2 Brace Panels (part D) on each level of long beams.

4. Put the Wire Shelves (part E) on each layer firmly. The shelf is assembled and ready to use.
